

Confident teachers teach higher level science lessons.

Five big picture physics concepts lay the foundation for biology, chemistry and earth science. Marcey leads your staff through interactive science explorations that have them up, moving and UNDERSTANDING core science concepts.

Teachers discover that, just as a puzzle makes more sense when you have the picture to work from, all kinds of science make more sense when you understand the physics that are their foundation!

- Gravity and Friction
- Energy transfer
- Light and Sound
- Molecular theory
- Forces and Motion

Rock Solid Science confidence turns a good teacher into an Inquiry Champion!

Marcey boosts the science confidence of thousands each year through live performances, workshops, keynotes and breakout sessions. A former teacher and "at risk" student herself, she speaks motivates counselors, educators and mentoring groups nationally including NSTA (National Science Teachers Association), National Drop Out Prevention Association, regional organizations and school districts nationwide

Reserve dates now for school, district and national events 2008-2009 and 2009-2010.
