

Summer Reading 2009

Get Creative @ the Library!

Express Yourself @ Your Library!

with

Marcey Walsh

STAFF DEVELOPMENT

Technological, generational and economic transitions can sink an organization faster than you can say "Plan Overboard!" Get on Marcey's schedule for an effective FUN staff development program this year

SR Touring programs:

Kids (pre-K - 8th)

Catch the Wave!

We'll be makin' music by learning science! Marcey Walsh, the Science Lady, explores how whoopee cushions, slinkies and water balloons explain the science of sound and music in a way you'll NEVER forget. We'll have BIG fun learning about tiny little vibrations!

(You also get a booklet of simple hands on activities to build musical instruments!)

Light up your Life!

Lasers, prisms and a light wall make this interactive program dramatic and memorable as we explore the secrets of light and color that make art possible. Science and art make an irresistible combination!

"Darkable" room for most dramatic show, anything but outside in daylight will work.

TEENS

BYOB - Bring Your Own Brain!

This is your brain on paper! We'll need: Markers, Paper and Teens with lots of BIG ideas
Harness Mind Mapping - the method both Leonardo da Vinci and Bill Gates used to let their brains out to play! While having fun with color and their unique drawing styles, teens SEE the connections between what they want and what they must do to make it happen.

(Fun session! No artistic talent needed.)

"This rocks!" -12 year old participant, Auburn Hills, MI "I'll use this everyday..." - College freshman, Charlotte, NC.

Groups WANT to help you bring in **high quality, educational programs** for your community's kids! Check our website for our free Funding Tips Sheet to find untapped sponsorship dollars in your community.

Marcey will be touring nationally for Summer Reading 2009. Book EARLY to get the date you need. We'll build other programs around your date so you'll qualify for a great tour discount!

Recent Raves...

(I'd love to do this great a job for you!)

"Marcey, it seems you were once again a smashing success with the kids! My assistant's comment was that she would book any of your programs again!"

Marian Rafal,
Bloomfield Twp. Library

" You did an excellent job of making learning fun in a very unique, creative way. Everyone raved about it! Thank you again for making our programming a success."

Neidermeier Elementary

"How can kids NOT get excited about science when you show up in those rainbow coveralls!?! Your presentation was excellent: beautifully conceived, right on with the examples for the concepts being taught, and nicely delivered to the kids. You had them "vibrating" with excitement about sound!"

3rd Grade Teacher, East Lansing, Michigan

"I got so many questions now I can't think them all!"

- Second grader

"It was neat how you connected everything together, it's like a puzzle to figure out!"

- Fifth grader

"We really enjoyed your program. I got a definite thumbs up from all the branch people, too. We will certainly have to have you back again!"

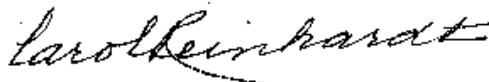

- Sarah McCarville, Grand Rapids Library

We appreciate having had an opportunity to have you at our Gaston County Public Library to present such a dynamic science performance, and we thank you for sharing your time and talents with us. I do hope that we'll be able to bring you back to our summer readers next year.

You are a treasure!

Carol Reinhart
Program Coordinator,
Gaston County Library (NC)

Best regards,

Carol Reinhart
Program Coordinator

Haven't had time to process all the raves from 2008 yet...29 shows in NC, MI, FL and NY! Whew...
